

Carbon Project Information Template

The Social Impact Trading desk is a carbon trading platform linking clients to carbon credits, sourced from projects within Australia and Internationally.

Our trading platform forms part of the overall carbon solution offered by the Aboriginal Carbon Environmental Services (ACES) group. In turn this company is owned and operated by the Aboriginal Biodiversity Conservation Foundation ("ABC Foundation") which is a majority Aboriginal controlled, member-based charitable social enterprise.

This document was developed to capture core project information that will allow potential buyers an insight into your carbon project and any social impact that it may deliver. We draw on the verification elements developed by the ACES and ABC Foundation social impact principles and the United Nations Sustainable Development Goals (SDG's) to create this template.

The ABC Foundation recognises the need for IP security and integrity and will work hard to secure and protect any information given by each carbon project. If you have any questions relating to this document, our trading desk, ACES, or the ABC Foundation, please contact us at info@acesau.com.au

Carbon Project Social Impact Outcomes

The ACES carbon development group works with clients to maximise the social impact that each individual project may be able to deliver. This impact supports and benefits local communities and has the potential to maximise carbon credit value at the time of sale.

Broadly, the social impacts potentially viewed by the carbon market as “value adding” or “premium” in nature include:

- 1. Aboriginal Training and Employment** – evidence that the carbon project has assisted in the creation of apprenticeships, traineeships, and employment for Aboriginal people is crucially important as it provides a source of income, financial independence, and skills development.
- 2. Regeneration of Country & Traditional Ecological Knowledge Transfer** – evidence that the regeneration of country has delivered significant environmental benefits such as increased abundance of native flora and fauna, returned biodiversity, increased health of the soil, improved water ways and carbon sequestration which has implications for climate change. The regeneration of Country is further encouraged through vegetation management, pest management and fire management. These can all be conducted using western methodologies and traditional ecological knowledge (TEK) by Aboriginal rangers and pastoral leaseholders.

- 3. Aboriginal-Led Project Decision Making** – evidence of the empowerment of Aboriginal project partners to become informed decision-makers where applicable over the project decisions, access to Country and management of heritage sites.
- 4. Value-Add Business Opportunities** – evidence of additional commercial ventures on pastoral lease properties using the income from the carbon farming projects. This enables greater economic diversification, wealth creation, support of a wider spectrum of employment and training opportunities for local Aboriginal People.

Examples of social impact areas can be seen in Appendix 1 section within this document.

ABC
Foundation

Aboriginal Biodiversity Conservation

ABC On-Country IMPACT
Aboriginal people leading the growth of
a sustainable land and sea economy.

The 2030 Agenda for Sustainable Development, adopted by all United Nations Member States in 2015, provides a shared blueprint for peace and prosperity for people and the planet, now and into the future. At its heart are the 17 Sustainable Development Goals (SDGs), which recognize that ending poverty go hand-in-hand with strategies that improve health and education, reduce inequality, and spur economic growth – all while tackling climate change and working to preserve our oceans and forests.

The table following provides an opportunity for each carbon project to expand upon the impact their project is having to support the relevant SDG's.

SDG Category	SGD Target	UN Proposed Indicators	Carbon Project Indicator
<p>1 NO POVERTY</p>	1.1 By 2030, eradicate extreme poverty for all people everywhere, currently measured as people living on less than \$1.25 a day	1.1.1 Proportion of population below the international poverty line, by sex, age, employment status and geographical location (urban/rural)	Number of people living in poverty who have financially benefitted from the project.
	1.2 By 2030, reduce at least by half the proportion of men, women and children of all ages living in poverty in all its dimensions according to national definitions	1.2.1 Proportion of population living below the national poverty line, by sex and age	<p>Project Specific Supporting Information</p> <p><i>List the indicator(s) that can be measured, if applicable. E.g. annual MWh of clean energy produced. If not relevant to your project, please put "N/A" below.</i></p>
		1.2.2 Proportion of men, women and children of all ages living in poverty in all its dimensions according to national definitions	
	1.3 Implement nationally appropriate social protection systems and measures for all, including floors, and by 2030 achieve substantial coverage of the poor and the vulnerable	1.3.1 Proportion of population covered by social protection floors/systems, by sex, distinguishing children, unemployed persons, older persons, persons with disabilities, pregnant women, newborns, work-injury victims and the poor and the vulnerable	
	1.4 By 2030, ensure that all men and women, in particular the poor and the vulnerable, have equal rights to economic resources, as well as access to basic services, ownership and control over land and other forms of property, inheritance, natural resources, appropriate new technology and financial services, including microfinance	1.4.1 Proportion of population living in households with access to basic services	
		1.4.2 Proportion of total adult population with secure tenure rights to land, with legally recognized documentation and who perceive their rights to land as secure, by sex and by type of tenure	
	1.5 By 2030, build the resilience of the poor and those in vulnerable situations and reduce their exposure and vulnerability to climate-related extreme events and other economic, social and environmental shocks and disasters	1.5.1 Number of deaths, missing persons and persons affected by disaster per 100,000 people	
		1.5.2 Direct disaster economic loss in relation to global gross domestic product (GDP) ^a	
		1.5.3 Number of countries with national and local disaster risk reduction strategies	
	1a Ensure significant mobilization of resources from a variety of sources, including through enhanced development cooperation, in order to provide adequate and predictable means for developing countries, in particular least developed countries, to implement programmes and policies to end poverty in all its dimensions	1.a.1 Proportion of resources allocated by the government directly to poverty reduction programmes	
1.a.2 Proportion of total government spending on essential services (education, health and social protection)			
1b Create sound policy frameworks at the national, regional and international levels, based on pro-poor and gender-sensitive development strategies, to support accelerated investment in poverty eradication actions	1.b.1 Proportion of government recurrent and capital spending to sectors that disproportionately benefit women, the poor and vulnerable groups		

SDG Category	SGD Target	UN Proposed Indicators	Carbon Project Indicator	
<p>2 ZERO HUNGER</p> 	<p>2.1 By 2030, end hunger and ensure access by all people, in particular the poor and people in vulnerable situations, including infants, to safe, nutritious and sufficient food all year round</p>	<p>2.1.1 Prevalence of undernourishment</p>	<p>Area of land under sustainable agricultural practices.</p>	
	<p>2.2 By 2030, end all forms of malnutrition, including achieving, by 2025, the internationally agreed targets on stunting and wasting in children under 5 years of age, and address the nutritional needs of adolescent girls, pregnant and lactating women and older persons</p>	<p>2.1.2 Prevalence of moderate or severe food insecurity in the population, based on the Food Insecurity Experience Scale (FIES)</p>	<p>Project Specific Supporting Information</p>	<p><i>List the indicator(s) that can be measured, if applicable. E.g. annual MWh of clean energy produced. If not relevant to your project, please put "N/A" below.</i></p>
	<p>2.3 By 2030, double the agricultural productivity and incomes of small-scale food producers, in particular women, indigenous peoples, family farmers, pastoralists and fishers, including through secure and equal access to land, other productive resources and inputs, knowledge, financial services, markets and opportunities for value addition and non-farm employment</p>	<p>2.2.1 Prevalence of stunting (height for age <-2 standard deviation from the median of the World Health Organization (WHO) Child Growth Standards) among children under 5 years of age</p>	<p>2.2.2 Prevalence of malnutrition (weight for height >+2 or <-2 standard deviation from the median of the WHO Child Growth Standards) among children under 5 years of age, by type (wasting and overweight)</p>	
	<p>2.4 By 2030, ensure sustainable food production systems and implement resilient agricultural practices that increase productivity and production, that help maintain ecosystems, that strengthen capacity for adaptation to climate change, extreme weather, drought, flooding and other disasters and that progressively improve land and soil quality</p>	<p>2.3.1 Volume of production per labour unit by classes of farming/pastoral/forestry enterprise size</p>	<p>2.3.2 Average income of small-scale food producers, by sex and indigenous status</p>	
	<p>2.5 By 2020, maintain the genetic diversity of seeds, cultivated plants and farmed and domesticated animals and their related wild species, including through soundly managed and diversified seed and plant banks at the national, regional and international levels, and promote access to and fair and equitable sharing of benefits arising from the utilization of genetic resources and associated traditional knowledge, as internationally agreed</p>	<p>2.4.1 Proportion of agricultural area under productive and sustainable agriculture</p>	<p>2.5.1 Number of plant and animal genetic resources for food and agriculture secured in either medium or long-term conservation facilities</p> <p>2.5.2 Proportion of local breeds classified as being at risk, not-at-risk or at unknown level of risk of extinction</p>

Appendix 2 - Social Impact Table Examples

Impact Priority Areas	Carbon Farming Economic Activities	Value-Added Activities
Aboriginal Training and Employment	Elder Engagement	<p>Engagement with local Aboriginal community elders, who are the custodians of TEK. Facilitates elders returning to country, being engaged in a range of social programs and re-establishing, and sharing of TEK. Elders can be financially remunerated for their time, expertise and travel and accommodation expenses.</p> <ul style="list-style-type: none"> On the pilot projects, expect to undertake 2x Elder Engagement activities per annum.
Regeneration of Country and TEK Knowledge Transfer	Vegetation management; Pest management	<p>The removal of non-native weeds and pests helps to support the regeneration of the native bush and return of native biodiversity. This will happen across the carbon project area.</p> <p>Where possible, implementation of TEK practices above and beyond western chemical and trapping methods will be used.</p>
	TEK program, community, and education programs	<p>All the TEK programs, community, and education programs established by ABC Foundation and project partners will develop, share and use TEK.</p> <p>Pilot project staff, families and the wider community connected to the property are expected to participate in the following programs, both on the properties and supported through profits on On-Country Carbon:</p> <ul style="list-style-type: none"> 2x Youth camps 6x On-Country Fields Trips 4x Country play groups through On-Country Education 4x In-school programs through On-Country Education 500 meals for Food for the Mob per week through On-Country Enterprise
	Cultural resource mapping	<p>Undertake a Cultural Resource Mapping Program of the pilot properties. This helps to re-establish spiritual connection to Country and make visible the local stories, practices, relationships, memories, and rituals specific to the pilot properties and surrounding areas.</p>
	Traditional Fire Management	<p>Rangers to engage in traditional fire management alongside regional fire services. This provides the opportunity for two-way learning and integration of TEK into western fire management practices.</p> <p>Fire management is crucial for regeneration of the western Australian native bush and manages the risk of bushfires.</p>
Aboriginal-Led Project Decision Making	Financial and strategic decision making	<p>The carbon project will create an opportunity for Aboriginal people to sit on a governing Board to ensure its sustainable success. Appropriate training in Board governance, reporting and engagement will be rolled out to compliment these positions.</p> <p>For all roles created by this project a management training program will be delivered to ensure leadership and business skills are tailored and developed for each specific opportunity.</p>
	Heritage site surveys, research, and monitoring	<p>Undertake 4x heritage site surveys and employ rangers to undertake the maintenance of these sites as needed. Management of these sites will be undertaken by the pilot project pastoral leaseholders.</p> <p>This is the re-connection, documentation, and preservation of heritage areas on-Country by Aboriginal elders and community.</p>

Impact Priority Areas	Carbon Farming Economic Activities	Value-Added Activities
Aboriginal-Led Project Decision Making	Managing access to Country	The pilot properties can be used as place for training On-Country, providing reconnection with Community and Country. Decision-making over when and how the properties will be accessed for these purposes, and others will be at the discretion of the pastoral leaseholders.
	TEK program, community, and education programs	Decision making authority about the types of TEK, community and education programs undertaken on pastoral leases in partnership with ABC Foundation will be given to the Native Title holders and pastoral leaseholders. This will be supported by building capability in stakeholder engagement and consultation.
	Self-managed herd	Through working closely with the Aboriginal Corporation, will restock the property with a self-managed herd as opposed to lease of the property's pastures to other pastoralists.
Value-Added Business Opportunities	Tourism businesses	Still to be determined through engagement with the local Aboriginal community, Aboriginal Corporation, and pastoral lease holders. However, there is potential for additional ventures in tourism and bush foods. These can be supported by ABC On-Country Enterprises but will be owned and driven by the Aboriginal Community itself.
